## **GIS Summer Intern Position**

The Marshall County Planning and Zoning/Environmental Public Health Department and the Marshall County GIS Department would like to hire a shared intern/summer employment position. This will be a temporary position that would not be eligible for IPERS or other employment benefits.

Marshall County and the departments within pride themselves on the use of a wide variety of current technology. The successful candidate would have access to Marshall County's five person IT department and two person GIS department.

Marshall County uses ESRI's ArcView, ArcInfo, ArcSDE (Microsoft SQL) and ArcIMS software products for our GIS applications.

Current GIS projects range from infrastructure inventory to analysis in nature and are being developed for deployment on the internet, intranet and/or via mobile devices.

The successful candidate would spend approximately 50% of their time on planning, zoning and environmental public health projects. The balance of their time would be spent on a variety of projects for, but not limited to the Marshall County Conservation, Engineering, Emergency Management, Attorney and Assessor departments.

It is preferred that the successful candidate have experience with ESRI's ArcView, ArcEditor and/or ArcInfo. That experience should be with versions 8.x or 9.x of the ArcGIS software.

It is also preferred, though not a requirement, that the successful candidate have a background in Planning and Zoning, a good working understanding of relational databases and experience with GPS equipment.

Additional skills in web design, Microsoft SQL, programming languages and open source products such as Linux will be considered in selecting the most qualified candidate.

The hourly wage will be \$10-\$12 per hour. This will be negotiable base on the candidates experience and qualifications.

We are currently considering a minimum of 8-10 weeks at 40 hours per week or a minimum of 320 hours over a longer period of time. We are currently pursuing another source of funding that may allow us to offer 10-12 weeks of employment based on a 40 hour week.

We are willing to consider flexible hours such as four (4) ten hour days for convenience and/or to reduce commuting expenses.

The employment starting date is flexible depending on the student's availability and funding balances for each department's FY2007 budget that ends June 30, 2007. The balance will be paid out of the FY2008 budget starting July 1, 2007.

Persons interested in the above full time temporary vacancy shall submit a cover letter and resume to the attention of Wayne Chizek, GIS Director: [wchizek@co.marshall.ia.us](mailto:wchizek@co.marshall.ia.us) by the closing date. Cover letters and resumes will be accepted until April 12, 2007.
